

**Statement regarding Safety Data Sheet request for plastic insert grid
June 2026**

Subject: Safety Data Sheet request – plastic insert grid for WECK preserving/canning appliance

Dear Sir or Madam,

Thank you for your request regarding a Safety Data Sheet for the plastic insert grid used in WECK preserving/canning appliances.

We hereby confirm that the referenced plastic insert grid is a finished article/component and not a chemical substance or mixture. Therefore, according to the principles of Regulation (EC) No. 1907/2006 (REACH), Article 31, a Safety Data Sheet is not required for this product.

The product is supplied as a solid, moulded plastic article. Under normal and intended conditions of use, it does not release hazardous substances and does not require specific chemical handling measures comparable to those applicable to substances or mixtures.

Based on the documentation and supplier confirmations available to us, we can additionally confirm the following:

- The plastic components used for the preserving/canning appliances, including the insert grid, are covered by food-contact-related compliance documentation.
- The material is confirmed as suitable for food-related applications within the intended use of the appliance.
- The product is covered by REACH and RoHS compliance confirmations available to WECK.
- According to the information available to us, the materials used do not contain substances of very high concern (SVHC) above the applicable legal thresholds.
- The product is not classified as dangerous goods for transport.
- No special storage, handling, first-aid, fire-fighting, accidental release, exposure-control or disposal measures comparable to a chemical product are required under normal conditions of use.

The insert grid is intended to be used exclusively as a component inside the WECK preserving/canning appliance in accordance with the appliance instructions. It is not intended to be used separately or under conditions exceeding the specified appliance use.
