

DECLARATION OF CONFORMITY
For Glassware Intended for Contact with Food

LIMITED LIABILITY COMPANY PESKOVSKY GLASS PLANT, as a manufacturer of glass food packaging, takes all measures to ensure that all products placed on the market comply with legal requirements applicable to the manufacture of glass products intended to come into contact with food, and meet the requirements of the reference standard, product safety and quality management system in accordance with FSSC 22000 (Safety and Quality Management System certification scheme, including requirements ISO 22000:2018, ISO/TS 22002-4:2013 and additional FSSC 22000 requirements (Version 6), certified by TÜV AUSTRIA HELLAS.

Products	Description
Glass products	JARS
Contact with food at the temperature	From -5°C to + 130°C
Duration of contact with food	In accordance with Council Directive №94/64/EC of December 20, 1994 on packaging and packaging waste, Article 11 Levels of concentration of heavy metals in packaging (model solutions - 4% acetic acid and distilled water at a temperature of 22±2 °C, exposure for 24 hours)
The ratio of the contact surface area to the volume used	From 0.03 m ² /l to 0.1 m ² /l
Composition	Quartz sand, lump dolomite, lump limestone, feldspar materials, technical soda ash, technical sodium sulfate, calcined petroleum coke, cerium oxide, selenium, cobalt oxide
Processed raw materials	From 10 to 60%
Storage conditions	Temperature: from -40°C to +45°C

Intended use:

For canned food, including juices, ketchups, sauces, pastes, jams, etc.	Yes
Food water	Yes
Alcoholic products	Yes
Foods with acid content	Yes
Fatty foods	Yes
Dried food	Yes
Cold food	Yes
Warm food	Yes
Hot food	Yes
Use in the oven, microwave	Yes, with gradual heating and cooling without a metal lid and additional labels

Our products meet the following requirements:

- EU Regulatory Document 1935/2004 (as amended) on materials and articles intended to come into contact with food;
- EU Regulatory Document 2023/2006 (as amended) on practices for the proper production of materials and articles intended to come into contact with food.

With this declaration, we inform you that, in the production of colorless glass, glass products, glass has the following chemical composition:

Title	Formula	E cipher	Oxide content in the glass, %
Silicon dioxide	SiO ₂	E551	71.9±0.3
Sum of sodium and potassium oxides	Na ₂ O+K ₂ O	-	13.4±0.2
Calcium oxide	CaO	E529	10.0±0.3
Magnesium oxide	MgO	E530	2.2±0.2
Aluminum oxide	Al ₂ O ₃	-	2.2±0.2
Iron oxide	Fe ₂ O ₃	E172	<0.1
Sulfur oxide	SO ₃	-	0.2±0.2

The products comply with Directive 90/220/EEC, which sets standards for the intentional release of GMOs into the environment.

Allergenic substances are not used in the production process of the above products in accordance with the Regulatory Document 1169/2011 EC.

In accordance with Directive 94/62/EC (as amended) **LIMITED LIABILITY COMPANY PESKOVSKY GLASS PLANT** does not intentionally use or add heavy metals such as hexavalent chromium, cadmium, mercury, lead or substances containing these elements during production.

Although the presence of these substances is not expected under normal conditions of use of the materials, an analysis to determine the migration of these substances is required:

Heavy metal migration	Method of analysis	Indicator value according to the requirements of Directive 94/62/EU	Result, Ppm
Lead	DSTU ISO 7086-1:2002	Not more than 100 Ppm	0.26
Cadmium			0.06
Mercury			Less than 0.0025
Chromium			0.12

With this declaration, we inform you, that our products do not contain the PFAS/PFOS substances and BPA (Bisphenol A), taking into account the results of numerous laboratory investigations, which prove the glass containers typically do not have PFAS/PFOS and BPA. Moreover, the glass containers do not come under migration control of PFAS/PFOS and BPA, as this migration is basically impossible due to the fact the glass containers do not have the PFAS/PFOS substances and BPA.

Although **LIMITED LIABILITY COMPANY PESKOVSKY GLASS PLANT** does not intentionally use radioactive materials and the presence of these substances is not expected under normal conditions of use of the materials, an analysis to identify these substances is required:

Indicator	Standard Bq/kg	Result, Bq/kg			Method of analysis
Effective specific activity	Not more than 370	24.0			NRBU-97/ MVI.MN 4498-2013
		Radium 226	Thorium 232	Potassium 40	
		10.1	2.19	129
